

PROTECT. EMPOWER. ELEVATE.

Vital Guardian is a cutting-edge health and safety solution powered by wearable technology. It continuously monitors key physiological signals – **tracking parameters such as fatigue, heat stress, and sleep quality**, to protect people working in high-risk or isolated environments. From **Defence operations and frontline responders to personnel working in challenging industrial environments**, Vital Guardian keeps teams safe, alert, and performing at their best.

KEY FEATURES

Secure Edge Intelligence

Advanced algorithms run directly on the device, keeping data private while enabling real-time analysis and reliable alerts—even in low-connectivity environments.

Actionable Insights

Clear visual dashboards present data from mobile and cloud sources, giving supervisors an at-a-glance view of team well-being and readiness.

Flexible Integration

Built to adapt to your operational needs, integrating seamlessly across cloud infrastructures and on-premises networks.

WEARABLE INTELLIGENCE FOR SAFER, SMARTER WORKPLACES

OUR PROCESS

Discovery First

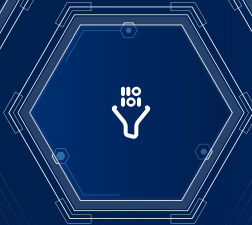

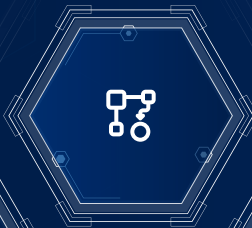

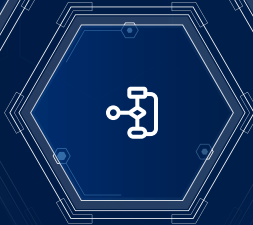

Work with you to understand the physical and environmental demands on

Co-Designed Solutions

Integrate seamlessly into workflows, connect with safety systems, and customise alerts and dashboards.

The Result

Safer workplaces, stronger teams, smarter decisions.

Tailored Insights

Track the physiological signals and provide the health and safety insights that matter most for your team.

Trusted Outcomes

Deliver a trusted, human-centred system that boosts safety, performance, and operational resilience.

THE VALUE

Protect People

Real-time safety intelligence.

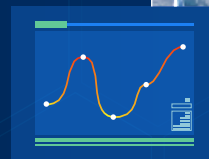

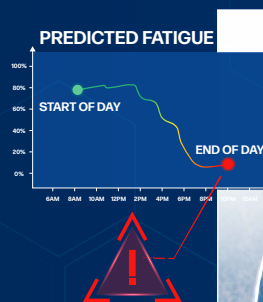

Empower Teams

Insights for smarter decisions.

Elevate Operations

Safer, healthier, more productive workplaces.
